IAPT for LTCs (Long Term Conditions)

Adults who have Type 1 or 2 Diabetes, COPD (Chronic Obstructive Pulmonary Disease) or Breathlessness, co-morbid with low mood/depression or worries, anxiety or stress.

We provide evidence-based cognitive behavioural psychotherapy (CBT). To help support people who may be feeling overwhelmed and have difficulties coping with their condition resulting in low mood or anxiety.

We are a team of psychological wellbeing practitioners, psychotherapists and psychologists who have specialist training in working with long term health conditions. We offer treatment over the phone, face to face or online. Treatment is tailored to the needs of each patient, and we work closely with acute and community physical health teams.

Types of treatment offered: individual CBT sessions, Guided Self-Help (GSH), Feeling Good or CBT for Breathlessness Groups, Computerised CBT and advice or signposting to other services that may help.

How to refer: You can refer online by visiting: lets-talk-iapt.nhs.uk or call 020 3074 2280.
GPs, other health professionals referrals *Self-referrals are accepted.*
